What Some of Our Clients Are Saying About Us...

“Given the need to insure a successful launch of our new company, we were referred to Proactive Computing. Since our relationship began 2 years ago, their accurate and reliable service has been unmatched by our other vendors! They are a ‘must have’ for our team,”

Anthony Turner
President, Financial Tracking, LLC.

“I have always found Jamie Epranian (President, Proactive Computing) to be very accessible when needed and that alone is very reassuring and comforting when my computers are so vital to my business success. He...has always been there with great innovative and cost effective ideas when I needed to upgrade or expand. I have and will continue to recommend (their) services to my clients,”

Richard J. Merck, CPA, CVA, ABV, CFFA
Owner & Founder, Merck CPAs & Consultants.

“We’re very satisfied with Proactive Computing’s services. They provide personalized service and solutions; work with us on budget and stand behind their work by fixing any problems that arise. When a crisis hits or problems occur, they respond,”

Mark Tilley
The Selbst Group, Inc.
At Proactive Computing, we put the pieces together to make technology work for you.

In today’s fast paced world, keeping business computers and networking systems running smoothly is challenging.

Some industry analysts estimate that 75% of all businesses are not adequately protected against external and internal threats.

Let Proactive Computing assist your company in developing an IT strategy that provides maximum security and usability.

With nearly 20 years of experience in the shifting world of technology, Proactive Computing understands that small businesses especially face unique challenges.

Our IT professionals are prepared to manage and develop the technology you depend on. At Proactive Computing, we know how to make technology work for you.

Networking & PC Support

Whether it's a website, an office PC, or a network, up-time is everything.

No one should guarantee that your technologies will work 100% of the time. However, the right choices can make all the difference. A well thought out strategy can eliminate most common problems.

Business data systems must be dependable, and Proactive Computing understands that your success is paramount. Thus, managing a clients’ data is essential to our success, and we take that responsibility very seriously!

Proactive Computing’s response is always timely and professional because tomorrow is too late for today’s needs.

Our Rapid Response™ service

This service includes remote desktop and server support services, which means that help is a few clicks away for most configuration issues. We solve problems the first time out, and do everything possible to ensure it won’t happen again.

Application Development

Proactive Computing is the best choice for your developmental needs. Our programming, design, and management skills has provided our clients with the most reliable and scalable solutions available.

With an average of 15 years of experience, our team of programming specialists has a reputation for quality, flexibility, and achievement.

Our in-depth, multi-platform technical knowledge enables us to select the most appropriate technologies to meet our clients’ unique needs. We deliver on spec, on time and on budget.

Whether you’re looking for a single-user desktop application, or a multi-million user per day web application, the Proactive Computing team is ready to exceed your expectations.
